NIK WEIS ABOUT BEING A “FAIR’N’GREEN” MEMBER

For me, FAIR’N GREEN is the modern alternative to existing sustainability, environmental and eco audits. My own motto is “con natura – no invicem”, that is with nature and not against it.

For me it is self-evident that great wines can only be produced and the viticulture related cultural landscape can only be preserved for future generations, if work is done with nature and its environment and not against it. So far this corporate philosophy has not been communicated externally with an audit label or the membership in an association. With FAIR’N GREEN this is now happening and, in my opinion, according to the best and holistic manner. FAIR’N GREEN does not only commit to the protection of the environment and the sustainable management, but also includes fair, social, societal and cultural interactions. This means taking sustainability one step further ahead.

A handwritten signature in black ink, appearing to read 'Nik Weis', is centered on the page.
